TESTIMONIAL

“GuruJal demonstrates solving water problems in practice and principle through scientific & participatory approach. It inspires all the stakeholders to collaborate and bring out systemic and behavioral change in addressing the water issues. We applaud the efforts and provide full support to this unique and inclusive initiative.”

Ms. Chandni Bedi

Director, Navjyoti India Foundation, Gurugram

RWH Structures functionality checks being done in all Govt. Schools of Gurugram District

RWH functionality check at Govt. Girl Senior Sec. School, Pataudi

1st May 2021

GuruJal has been carrying out the functionality checks of the rainwater harvesting structures in all the government schools of Gurugram District. In almost 571 govt. schools in the district, RWH functionality checks and whether the school is equipped with proper RWH structure or not, will be done. 16 RWH structures has been checked till now and the work has been currently halted due to closing of the schools due to COVID.

Water Awareness Session conducted with Dr. Kiran Bedi

1st May 2021

GuruJal in collaboration with Navjyoti India Foundation hosted a session on Water Awareness with Dr. Kiran Bedi (Water Warrior: Mission Water Rich Puducherry) on 1st May 2021. We received 370+ registrations and 350 + participants on zoom and Facebook live. This session was to make every citizen aware of our present water crisis and find solutions at individual level to Catch the Rain and Dr. Kiran Bedi Ma'am made it very interactive and insightful session by adding her perspective, guidance, and governance aspect to it.

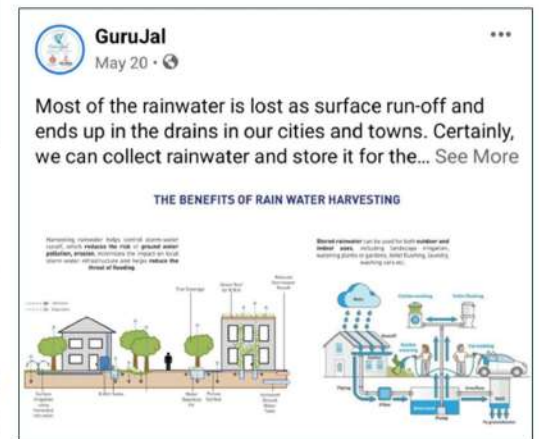

Water Awareness Session with Dr. Kiran Bedi

Digital Catch The Rain Campaign conducted through Social Media

13th May 2021

GuruJal has started the digital campaign in which information regarding the traditional water bodies, traditional water conservation and rain water harvesting methods and water auditing has been shared across to create awareness about rainwater harvesting among people.
